Integrating Imaginative Thought

The fear of uncertainty is what keeps most people from venturing beyond the comfort of walled gardens. Although the impulse to break from this mindset may arise occasionally. It doesn't necessarily translate into worldly action. Unless one consciously seeks to overcome an obstacle that hinders the attainment of a particular goal. An individual will live the remainder of their days wondering what could have been. The imagination’s vivid insights, not being able to sway the critical mind from its path. While it may appear a decisive victory for reason. It comes at the expense of sacrificing imaginative thought. The absence of which, contributes to a stagnation of creative potential. Unless an individual acknowledges the shortcomings of neglecting imaginative thought. Mental growth will naturally stagnate as a result of this decision.

The sooner one recognizes inconsistency in decision making. It's only natural for the mind to reflect upon reasons for a lapse of judgement. For the critical mind will seek to identify anything that may disrupt its rational goals. Should a conflict arise between emotive and logical thought. The mind that can recognize an inconsistent pattern, and act accordingly to correct it. Should have a natural advantage in difficult situations. To what end one chooses to utilize intuitive insight. Will naturally depend upon one's personal aspirations. The impulse to integrate opposing aspects of the mind. Should help pave the way towards a deeper comprehension of existence. As it provides the mind with a broader scope of experience to draw upon. Illuminating aspects of the mind that have yet to be explored in greater detail. The unification of opposing forces, contributing to a shift in the way one perceives the world.

A newfound sense of balance, acting as a source of strength in turbulent times. As that which obscured one’s understanding. The mind shall eventually comprehend

from a different perspective. The light of truth gradually dissolving all that stands as an impediment. Creating the necessary conditions for beneficial change. As transformation cannot take place without a decisive shift of mindset. For it is something that requires effort on behalf of the individual. Just as a seed cannot sprout without the rich nutrients from the soil. In the absence of a focused mind, forward momentum with regards to achieving a goal. Will seem to encounter an invisible wall. Unaligned thoughts, upending the meticulous plans one has devised. Unless creative potential aligns with a vision that attempts to uplift humanity's spirits. Whatever the imagination breathes life into. Will fail to strike an emotional chord with the collective.
